Install smoke and carbon monoxide alarms inside every bedroom, outside all sleeping areas and on every floor of your home.

Test smoke alarms monthly and replace batteries at least once a year.

Place fire extinguishers on each floor of your home, especially in the kitchen and garage.

Close your room doors at night as part of your bedtime routine. Closed doors help stop the spread of fire.

Create a fire escape plan and practice it twice yearly. Make the drill as realistic as possible.

“Every second counts in a fire emergency. Remember, a well-prepared family is a well-protected family.”
